# About Company

Project Advisory Partners (PTY) Ltd is a black-female owned engineering and construction management company that specialises in project management and the safe delivery of projects. We design and build infrastructure projects through our team of experts, which comprise project professional with over two decades of experience in the project environment.

---

At PAP, you have access to technical solutions and expertise that ensures the delivery of sustainable projects. The company was initiated with the aim to improve project success rate by closing the gap between project completion and the realisation of expected benefits, putting focus on the end user. Our success is centered around an effective stakeholder management system that guarantees the realisation of benefits during project completion.

Our aim is to provide innovative and sustainable solutions aligned with global trends and best practice, to ensure seamless project-to-operation transition and the realisation of expected benefits that exceed the business case. We are a team of Project Professionals and Change Experts, with more than 20 years in Project Management, with the past 10 years focused on PMO, operations readiness, risk and transition. Our approach is defining needs, identifying risks, strategic planning for readiness, development and implementation of procedures, systems, workplace tools and resources required to successfully operate and maintain a sustainable business

# Vision & Mission

## Vision

To be a trusted partner of choice for infrastructure projects.

## Mission

Provide world-class project advisory solutions, driven by sustainable growth and innovation.

## Values

**Sustainability** - Sustainability is central to our approach. We align our solutions with growing trends by prioritizing the reduction of carbon emissions and waste, environmental and social impact.

**Innovation** - We believe in adaptive solutions, driven by global markets and evolving technological trends.

**Partnerships** - We strongly believe in maintaining healthy partnerships and long-lasting relationships with our partners, built on trust and transparency.

**Agility** - Acknowledging that each organization is unique, our methods are tailor-made to suit business objectives and requirements, and adapt to new requirements.

**Accountability** - We are transparent in our business approach and remain accountable for the role we play in ensuring a successful delivery of projects.

# Our Services

## **Engineering and Construction Management**

- ▶ We design and build infrastructure projects through our team of experts, which comprise project professional with over two decades of experience in the project environment. We offer an experienced design office, as well as experts who have managed complex engineering projects. Our approach tailors solutions to meet end-user expectations post-handover. Our adept team offers a range of services including feasibility studies, design reviews, construction management, and more, ensuring successful project outcomes.

## **Operational Readiness and Transition**

- ▶ Our team will design a strategic operational readiness framework tailored for the unique requirements of your project. We recognise organisational culture and knowledge transfer as pivotal success factors and prioritise long-term stakeholder engagement. Our offering ranges from OR studies during feasibility, readiness execution, commissioning and ramp-up, stakeholder management studies and plans, and change management strategies.

## **Commissioning And Handover**

- ▶ Our commissioning strategy and process guarantees the safe installation, testing, and operation of equipment and systems according to design specifications. Our experienced team ensures smooth and timely commissioning by developing thorough plans and being on the forefront coordinating commissioning activities with relevant Subject Matter Experts (SME), particularly for the transfer of operating, maintenance, and diagnostic knowledge to the operations team, which is key for a smooth transition. Our additional services include procedure development, training, and performance systems implementation.

# Our Services

## Risk Management

- Our teams will establish a risk management plan which enables the identification of uncertain condition, understanding the impact, and responding by mitigating the risk. This involves the identification, analysis, and mitigation of risks while ensuring compliance with health, safety, and environmental standards. We focus on aligning systems with operational standards, ensuring safety across all project phases, and systematically improving high-risk areas. Throughout the project lifecycle, we conduct qualitative and quantitative risk analyses, along with hazard and constructability studies, to ensure successful project outcomes for our Clients.

## PMO Services

- Our company can deploy an experienced team of project management professionals to set up a fully functional PMO office guided by best practice PMO standards in industry. Our proposed methods of execution not only guarantees project success, but enables the establishment of a standard method of executing projects, that is in line with business objectives and organisational culture
